 U 1.2W/m²K

Designed specifically for conservatories and sunrooms, icosun neutral has the dual benefits of deflecting solar heat in the summer and reflecting heat back into the home in winter. Add to this self-cleaning and glare reduction properties and you have the ultimate conservatory glass.

- icosun neutral consists of two panes of toughened safety glass
- Argon gas in the space between the panes enhances insulation
- The outer pane has a permanent self-clean coating
- The inner pane has a transparent low-energy coating

Look for the label ...

Ask your installer about upgrading today.

Established in 1973, GlasSeal was the first manufacturer of hermetically sealed double glazing units in Ireland.

GlasSeal was also the first glass processor in Ireland to be awarded the British Standard Kitemark for its double glazing units.

Today, GlasSeal double glazing units are the industry benchmark for quality.

GlasSeal units are certified to EN1279, including Part 3 for Argon gas filling.

Only GlasSeal make icosun energy saving glass units. Every pane has a label identifying it as a genuine GlasSeal unit.
